BESPOKE STRUCTURAL GLAZING

INFINIUM

# BEAUTIFULLY CONSIDERED

Infinium brings together indoor and outdoor living spaces in exquisite harmony. Free-flowing spaces are created thanks to stunningly slim sightlines that bathe every surface with natural light. Uninterrupted panoramic landscapes provide complete escapism, without need of escape. While seamlessly integrated floor-to-ceiling glazing reflects the clarity of thought behind every inspired design decision.

A modern interior scene featuring a large window with a view of a garden, a grey sofa, a chair, and a white cabinet.

# EXCEPTIONAL DESIGN, WITHOUT EXCEPTION

Fully concealed aluminium outer frame and sash. Flush thresholds. Elegantly simple operation. Infinium's considered design impresses from every angle. However, its most remarkable design feature barely catches the eye. The impossibly thin 21mm sightlines create the illusion of large endless spaces. The effect is charming, yet practical. Minimalist, yet undeniably magical.
